GammaNET

Established in 2005

- **High expertise**
- **Global player with local availability**
- **Stable and trustworthy partner**

**OUR VISION IS TO BE
A LONG-TERM, STABLE
AND TRUSTWORTHY
PARTNER IN THE GLOBAL
SECURITY MARKET**

Gamanet a.s. was established in Slovakia in 2005 as a technology company focusing on software development. We focus our development activities on system integration for physical security. Our primary focus is to deliver a state-of-the-art and timeless software solution - The C4 integration security system.

Since our inception, we have developed to a global scale and operate in various regions of the world. Creative developers, expert supportive staff, experienced sales representatives.

Our professional team has already helped thousands of organizations during this period with a profitable investment in building security. In addition to a stable position in Central Europe, today we have direct representation Eastern Europe, North America, South America, the Middle East and Australia.

MAXIMUM QUALITY OUR BASIC CRITERIA

At Gamanet, we place great emphasis on quality. It is the cornerstone of the C4 system's development and also characterizes the results of our team's work. We are professionals who deliver a top solution for your security. All our processes require meeting the most demanding criteria. Professional staff, sophisticated architecture, comprehensive services and reliable support. Together with us, you will be able to achieve the highest goals and meet requirements in the highest quality in all areas.

**A GOOD
COMPANY

CLIENTS,
NOT
RETURNING
PRODUCTS**

GAMANET MOTTO

MEET THE TEAM

An international team of experts with high potential for creativity, many years of experience and a passion for achieving a common goal. We share a vision, which we project into reality every day with continuous commitment. Thanks to our international experience and individual approach, we supply a top product and reliable services. The only measure of our success is your satisfaction. Therefore, we listen and try to understand your needs and requirements.

Since the company's inception, we have managed to build a high-performing, stable and professional team of sales representatives, programmers, customer support operators and software architects, who translate your wishes into the language of information technology. We share our passion for building integration and security with customers from all over the world. We perceive every cooperation on a project as an opportunity to fulfill your dreams and ideas. We are a team that is enthusiastic and devoted to security technologies.

THE QUALITY OF A PRODUCT WILL NOT BE GUARANTEED BY THE NEWEST TECHNOLOGY, BUT BY CREATIVE AND PROFESSIONAL PROGRAMMERS.

***PETER KORNALSKÝ,
CHIEF OF DEVELOPMENT***

Gál Marian

*President & CEO
of Gamanet*

Marian Gál is the Chief Executive Officer and Chairman of the Board for Gamanet a.s., an innovator and technological leader who considers a strong and cohesive team of professionals to be the company's greatest asset.

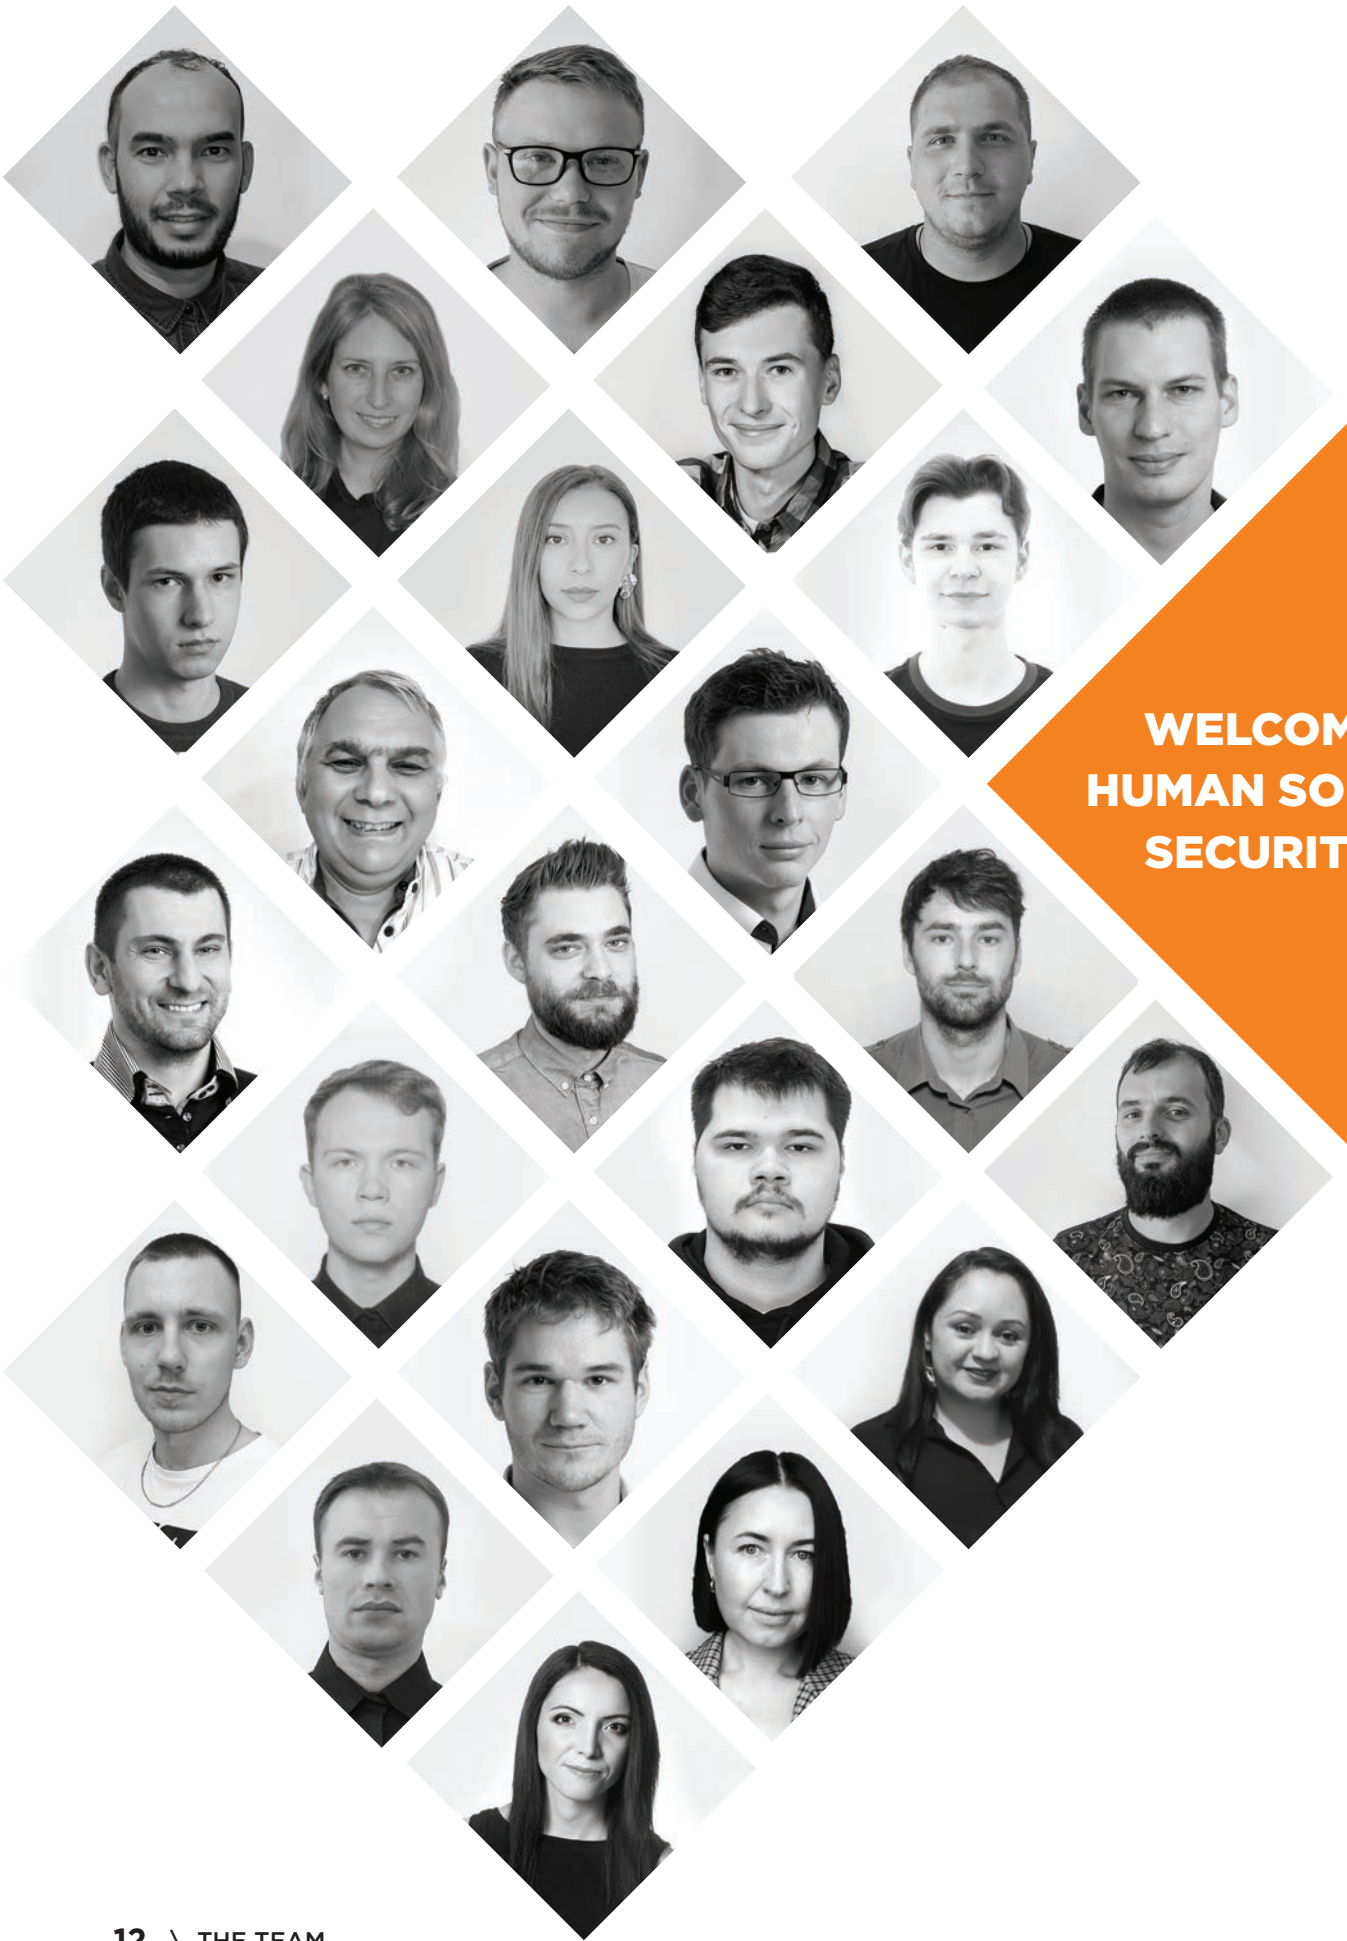

Upon graduating in the field of automation technologies at the Slovak University of Technology in Bratislava, he actively participated in numerous IT projects tasked with deploying extensive database solutions at several international companies. His story began in 1999, when he and other enthusiasts began working on the development of software for integrating building technologies. Since then, his work is fully dedicated to the development of security system integration.

In 2005, he founded the software company Gamanet a.s. and thanks to the business spirit and character of a visionary leader, he began to perfect his idea into a unique product - the C4 integration system. As a founding member, he participated in the creation of the initial stages of his design. With an innovative approach and attention to detail, he and his team have developed the timeless and flexible C4 software.

At present, in the position of Chief Executive Officer, he is fully engaged in defining the direction of product development, the creation of company-wide strategies and together with an executive team of equally enthusiastic employees, ensures the management of the company. Thanks to international business experience, he supports expansion of the company to new foreign markets. He is well known for his desire to face great challenges and provide solutions to the world of security that meet the most demanding customer requirements.

SECURITY ENGINE**

THE PRODUCT

C4-FLEXIBLE SOFTWARE FOR EVERYONE

Our main software product is the C4 integration system. It is a security system with complete management over building security. The C4 system integrates various physical security technologies from a wide range of manufacturers into a single comprehensive solution - an easy-to-use application. The application allows connection to access, intrusion protection systems, as well as camera, air conditioning or heating systems, all from renowned brands.

The C4 system can not only monitor premises, but also intuitively manage all integrated technologies from one place. It is unique in its unified management of credentials, managed persons and employees in one central database. C4 comprehensively informs about the current state of security and allows active control of connected technologies in real time. Operation of security systems is therefore time-efficient and very simple.

We continuously develop and improve the integration system in order to satisfy all global requirements of the security market.

C4 IS NOT JUST A PRODUCT, C4 IS A SOLUTION FOR SOLVING CUSTOMER'S NEEDS

LINDA KOVÁCSOVÁ, VP SALES

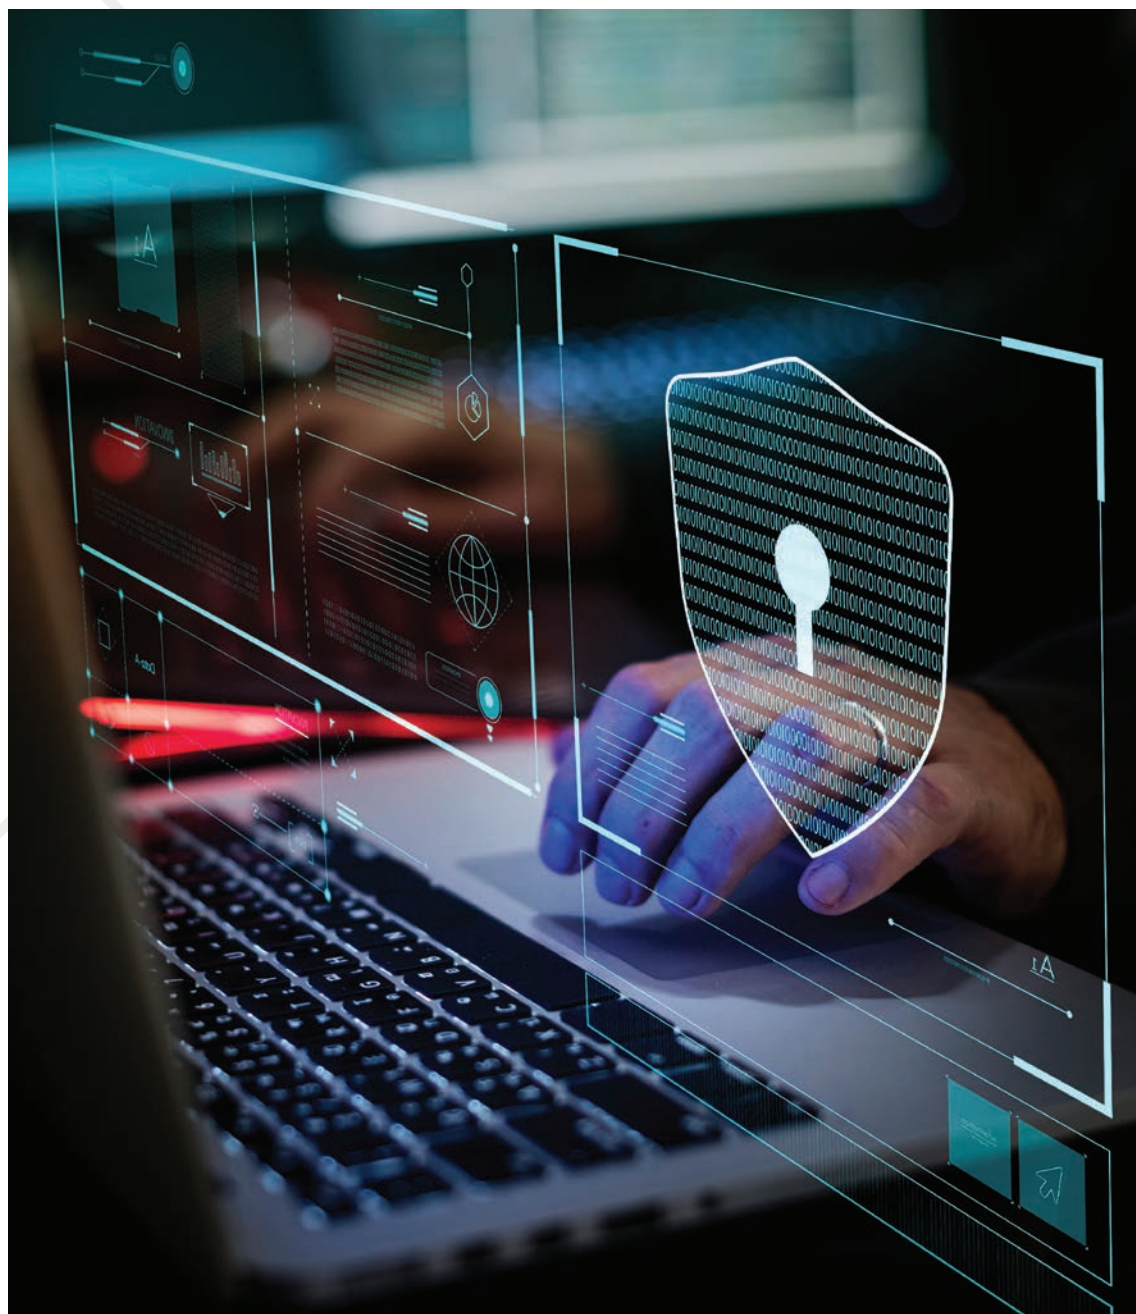

C4

WIDE RANGE OF INTEGRATED DEVICES

The C4 system is a unique solution in the global security market. This is thanks to the unified management of different types of systems from various manufacturers. In addition to the integration of new technologies, it also enables the implementation of devices that are already deployed on installations. We have connected hundreds of access, security and fire protection technologies into a harmonious whole.

Thanks to the C4 system, you manage both existing and newly deployed devices through a central solution with a unified approach and a unified database.

In the integration process of technologies to the C4 system we directly cooperate with the world's leading equipment manufacturers. However, in specific projects we also cooperate with local manufacturers in selected regions of the world. The number of integrated technologies is thus constantly increasing. You can find an up-to-date list on our product website at www.c4portal.com. We have developed C4 software to have the unique ability to control and manage an ever-growing number of devices in the security market.

Intrusion Protection System

Elevator Control

A SOLUTION
PROVIDER
WITH A
GUARANTEE OF
THE HIGHEST
QUALITY.**

ACTIVE SUPPORT OF GLOBAL PARTNER NETWORK

Gamanet's business activities are of a global character. The C4 software product is established in over 60 countries worldwide, and we cooperate with over 350 partners.

It is through a globally developed network of business partners that we carry out our primary business activities.

Our business partners are companies that are active in the implementation of security systems and offer a comprehensive solution of maximum quality through the C4 system. We develop direct sales activities with our business partners and provide them with business, technical, project and pre-sales support. We guarantee the quality of C4 system deployments through trainings and certification within the partner program. An up-to-date list of our contractual partners is available on our product website www.c4portal.com.

HOW TO BECOME OUR BUSINESS PARTNER?

Gamanet's business policy is based on cooperation with companies belonging to our Partner Program. It is an open system; therefore, your preferred integrator or hardware vendor can easily become our partner. We are always happy to provide you with business and technical training, explaining all the benefits of mutual cooperation. The sales department is ready to answer all your questions. Our professional technical team will assist you with C4 installation at your customers' sites. Become a part of our Partner Program, become a professional supplier of great security solutions!

VARIOUS PROJECTS ACROSS MANY COUNTRIES

Gamanet has several thousands of completed projects in its portfolio, since beginning its operation on the market. Installations can be found in various regions and countries of the world - Luanda in Africa, metropolitan Newcastle, modern and luxurious Abu Dhabi, historic Prague, Budapest or arabic Cairo.

The C4 system is implemented in banks that centralize their branches, industrial enterprises or power plants centralizing technological buildings. The system is currently deployed in many administrative buildings and business centers, international corporations as well as critical infrastructure facilities.

In addition to large and complex projects, we also focus on customers with simpler and smaller installations. Our integrated security solution is completely flexible thanks to its special architecture. Therefore, it is a suitable and affordable solution even for smaller modern businesses or offices that require quick installation, simple operation and intuitive management.

VISIT COMPLETED C4 PROJECTS

We offer you an opportunity to visit and experience the C4 system deployed at a specific site, from one of our many existing installations. You will see the complex live operation of the C4 system, on an existing implemented project at our customer's sites, performing in real conditions. The customers' most appreciated features will be presented in addition to the demonstration of central facilities management and device monitoring. Real operators who use the C4 system on a daily basis will openly share their practical experience with you. Just contact any of our business partners and get to know the unique C4 security system directly through our long-term customers.
